Floating License Available	Yes	Yes

Operating System	32-bit	64-bit	Minimum Revision Level
Windows 11	✓	✓	All
Windows 10	✓	✓	Service Pack 1
Windows 7	✓	✓	All

ExpertCAD View and ExpertCAD don't require a high-end computer or any special hardware option(s); any computer with even the most basic configuration will work well. *A tablet computer is not recommended as a traditional mouse is better for working with the user interface.* A display capable of a screen resolution of 1080 pixels in height (e.g. 1920 x 1080) is recommended but not required.

All applications can read all revisions of the ExpertCAD file format regardless of the version of the software produced the drawing or what platform (e.g. drawings produced on UNIX platforms can be read).
